

CREDIT CARD

WEEKLY STATUS REPORT

A concise project report covering data preparation, SQL import, DAX modelling, dashboard development and Week 52 insights.

PROJECT Credit Card Weekly Dashboard	REPORTING PERIOD Week 52 • 24 Dec	TOOLS SQL • Power BI • DAX
--	---	--------------------------------------

Prepared from the supplied weekly-status project document.

01 REPORT ROADMAP

The project is structured around five practical stages.

01	Project objective Define the business purpose and dashboard outcome.
02	Data from SQL Prepare CSV data, create SQL tables and import the data.
03	Data processing & DAX Create calculated columns and measures for analysis.
04	Dashboard & insights Track weekly KPIs, trends and customer behaviour.
05	Export & share project Package the analysis into a clear, stakeholder-ready report.

02 PROJECT OBJECTIVE

To develop a comprehensive credit card weekly dashboard that provides real-time insights into key performance metrics and trends, enabling stakeholders to monitor and analyze credit card operations effectively.

MONITOR

Track weekly performance

ANALYZE

Understand key trends

OPTIMIZE

Support operational decisions

03 DATA PIPELINE

Import data to SQL database

01	Prepare CSV file
02	Create tables in SQL
03	Import CSV file into SQL

The supplied project follows a simple ETL flow: prepare the source file, create the database structure, then load the data into SQL for downstream analysis.

04 DAX MODELLING

Calculated groups used in the dashboard

AgeGroup

```
SWITCH( TRUE(),  
customer_age < 30 → "20-30"  
30 ≤ customer_age < 40 → "30-40"  
40 ≤ customer_age < 50 → "40-50"  
50 ≤ customer_age < 60 → "50-60"  
customer_age ≥ 60 → "60+"  
otherwise → "unknown")
```

IncomeGroup

```
SWITCH( TRUE(),  
income < 35000 → "Low"  
35000 ≤ income < 70000 → "Med"  
income ≥ 70000 → "High"  
otherwise → "unknown")
```

These calculated groups make the customer-level data easier to segment in Power BI visuals.

05 DAX MEASURES

Weekly revenue logic

Week_Num_New = "Week-" & Week_Index

Revenue = Annual_Fees + Total_Trans_Amt + Interest_Earned

Current_week_revenue = SUM(Revenue)

Previous_week_revenue uses the current Week_Index and calculates revenue for CurrentWeek – 1.

06 WEEK 52 • PROJECT INSIGHTS

Reporting date: 24 Dec

WoW change	Revenue increased by -12.8%
Current week revenue	933,134
Previous week revenue	1,070,439
Overall revenue	57M
Total interest	8M
Total transaction amount	46M
Gender contribution	Male 31M • Female 26M
Card contribution	Blue & Silver = 93% of overall transactions
State contribution	TX, NY & CA = 68%
Activation rate	57.5%
Delinquent rate	6.06%
